PRIME COST OF DAYWORK RATES BASED ON THE BATJIC AGREEMENT

June 19 2023 to June 16 2024

Notes	Calculations	
1 BATJIC STANDARD HOURS AND HOLIDAYS INFORMATION		
a) The total number of hours worked per annum (pa) without holiday pay = 2028hrs.	52 Weeks x 39 hrs/week = 2028 hrs pa	<p>What are the Prime Cost of Day Work Rates?</p> <p>The Prime Cost of Day Work Rates are a guide for employers showing them how to work out the real cost of employment so that it can be factored into quotes for work. They show the workings out for these calculations based on application of the current BATJIC working rule agreement and pay rates. However, they do not cover other costs such as workers travel or accommodation, and do not cover any of the non employment costs that employers need to factor into quotes for work such as administration, supervision, materials etc.</p>
b) BATJIC pays 30 days holiday to a total of 234 hrs. NB - Must be representative of the pay received when someone is working.	17 Days Annual Holiday at 8 hrs/day	
	5 Days Annual Holiday at 7 hrs/day	
	7 Days Public Holiday at 8 hrs/day	
	1 Day Public Holiday at 7 hrs/day	
c) This means that the standard number of hours worked pa = 1794	2028hrs total - 234hrs holiday = 1794 hrs	
d) This means that there are 46 weeks worked in a year.	30 days holiday divided by 5 working days per week = 6 weeks holiday per year.
